

WASAFE

BUILDING SAFETY ASSESSMENT

[VANCOUVER, OCTOBER 16, 2019]

PRESENTED BY:

PAUL BRALLIER, SE, SEAW

DICK BOWER, CBO, CFM, CITY OF CARMEL

PROGRAM FOCUS

Reoccupy safe buildings

Postearthquake Safety Evaluation of Buildings

ATC-20

Original ATC-20 Document Developed by:

APPLIED TECHNOLOGY COUNCIL

With Funding From:

FEDERAL EMERGENCY MANAGEMENT AGENCY

OFFICE OF EMERGENCY SERVICES, STATE OF CALIFORNIA

OFFICE OF STATEWIDE HEALTH PLANNING AND
DEVELOPMENT, STATE OF CALIFORNIA

ATC-20 PowerPoint® Presentation Funded by:

FEDERAL EMERGENCY MANAGEMENT AGENCY

Under the Technical Assistance and Research Contract

**This PowerPoint® Presentation Is Based on Original
ATC-20 Training Materials Developed by:**

APPLIED TECHNOLOGY COUNCIL

Redwood City, California

Principal Investigator: Christopher Rojahn

Prepared for ATC by:

R. P. GALLAGHER ASSOCIATES, INC.

San Francisco, California

Principal-in-Charge: Ronald P. Gallagher

Original ATC-20 & WAsafe Presentation Modified by:

[name, position, organization]

SEISMIC HAZARD OVERVIEW

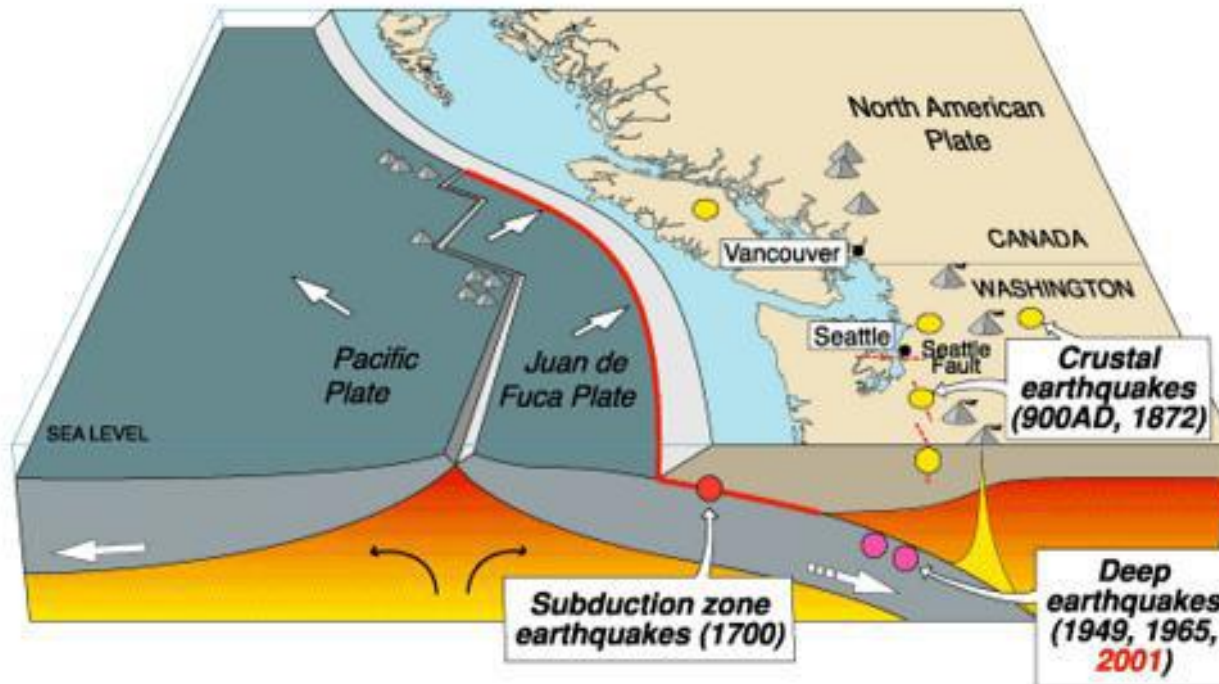

USGS SEISMIC HAZARD MAP

PACIFIC RIM – RING OF FIRE

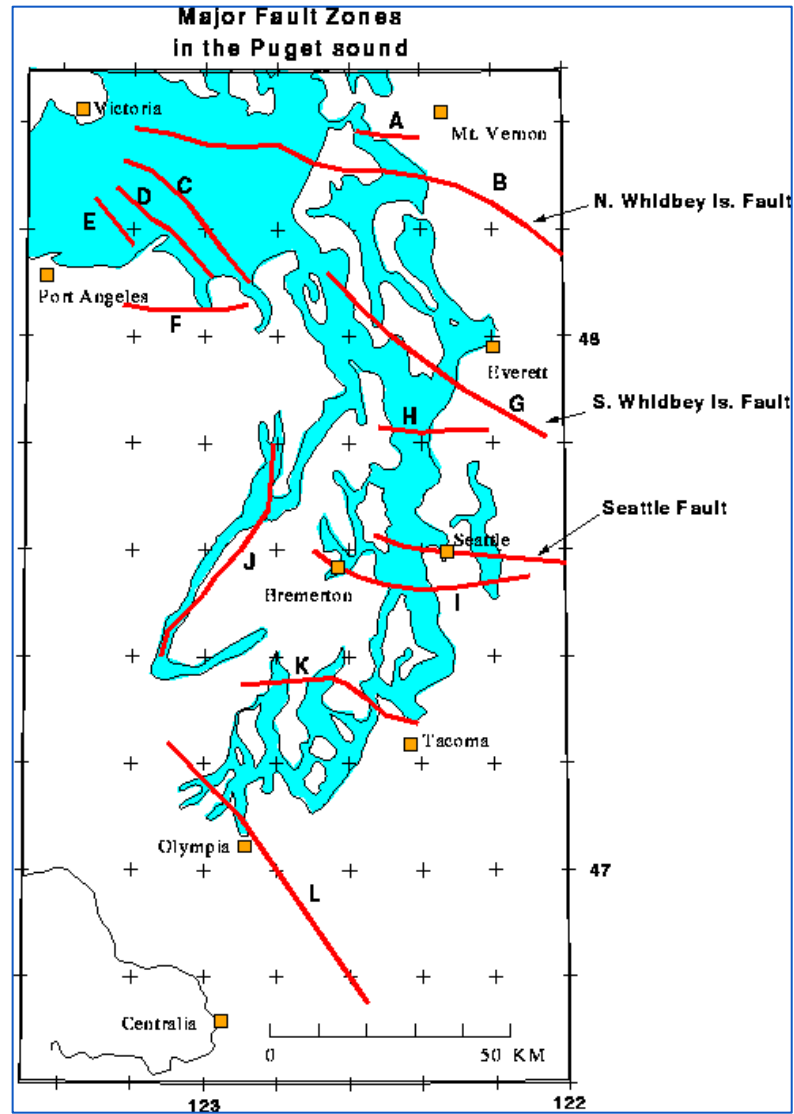

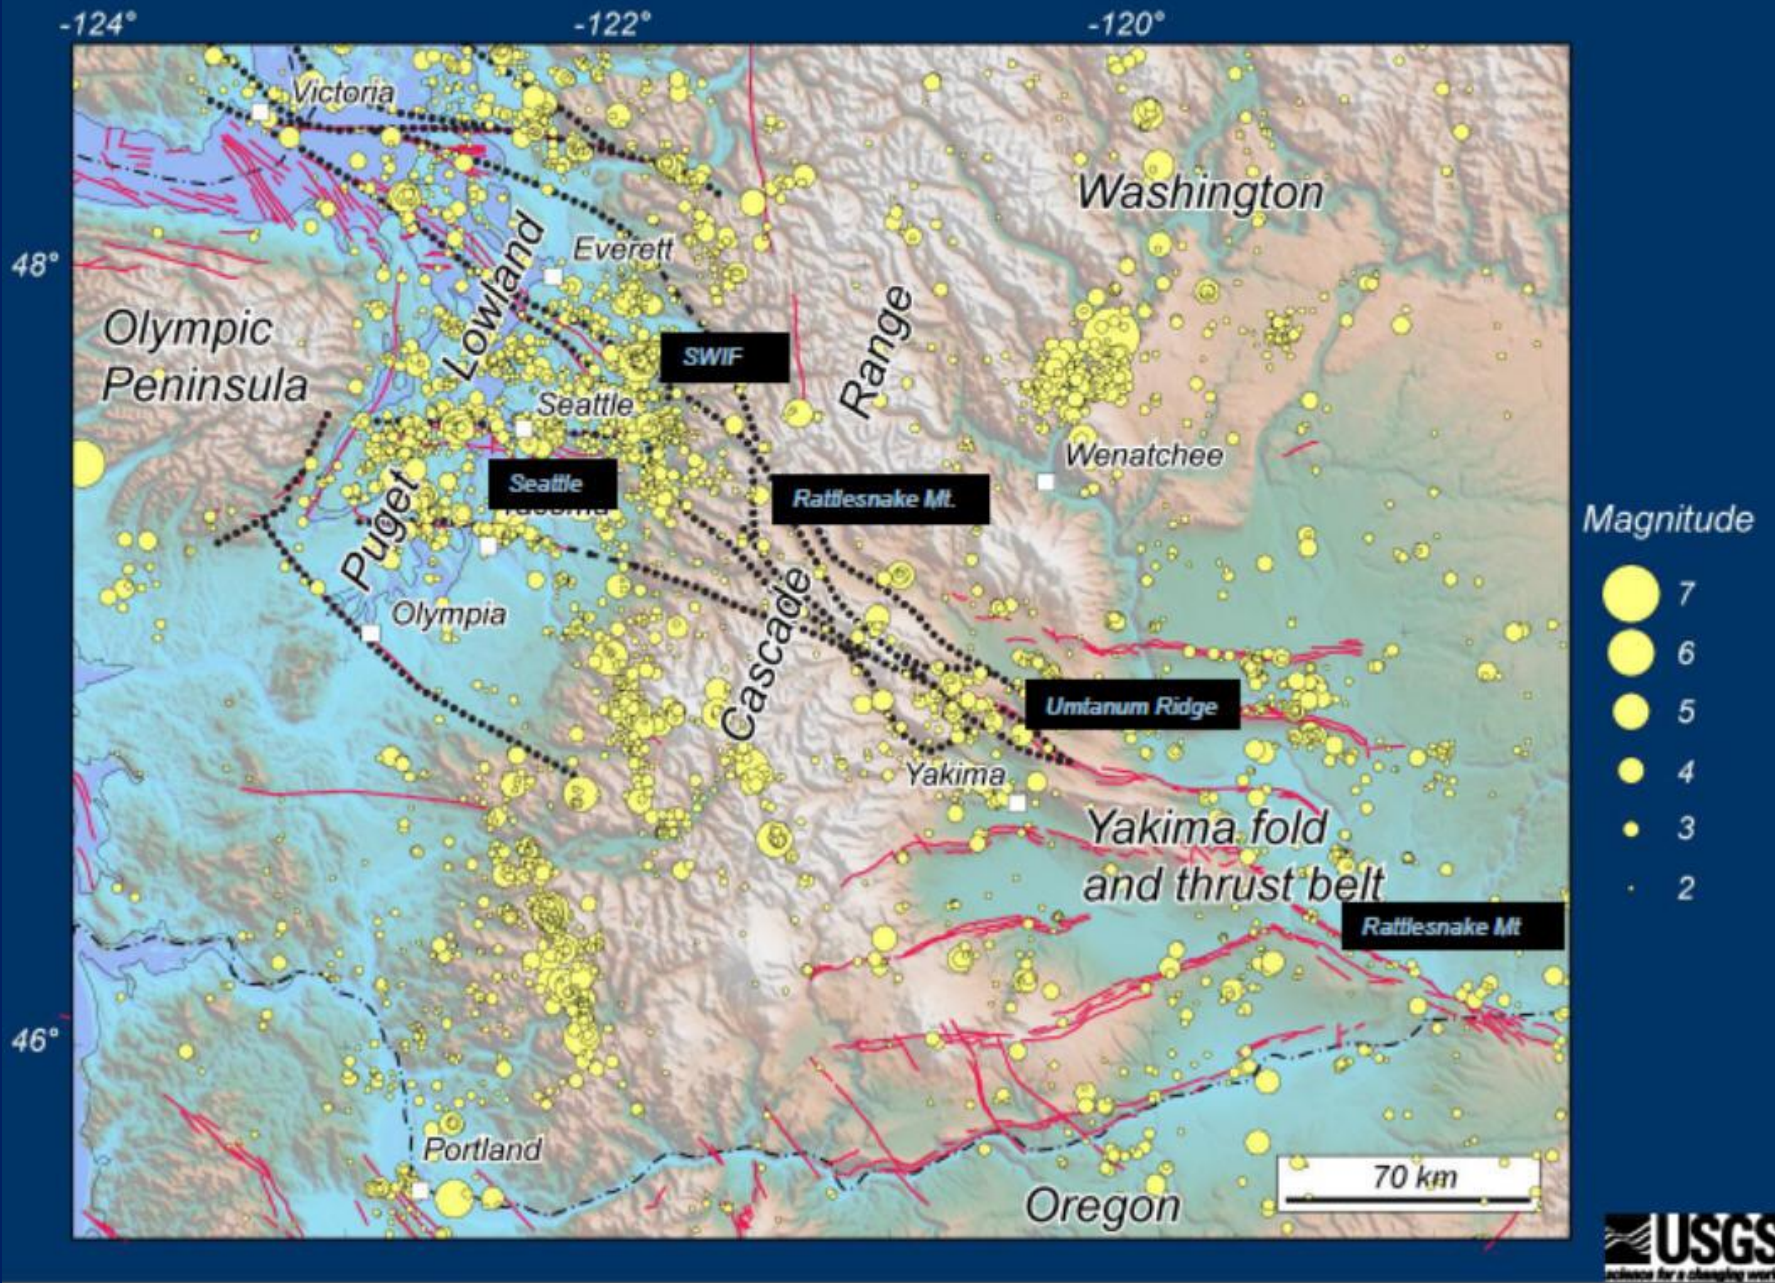

Cascadia earthquake sources

Source	Affected area	Max. Size	Recurrence
● Subduction Zone	W.WA, OR, CA	M 9	500-600 yr
● Deep Juan de Fuca plate	W.WA, OR,	M 7+	30-50 yr
● Crustal faults	WA, OR, CA	M 7+	Hundreds of yr?

PUGET SOUND FAULT ZONES

RICHTER SCALE

Richter Magnitude (M_L)	4	→	6	→	8
Energy Increase Ratio			1,000		1,000

Moment Magnitude (M_w) more commonly used today

MODIFIED MERCALLI INTENSITY SCALE

- MMI VI** Windows broken. Books off shelves. Weak plaster cracked.
- MMI VII** Damage to weakest masonry. Weak chimneys broken. Fall of plaster, loose bricks, tiles, unbraced parapets.
- MMI VIII** Damage to weak masonry, partial collapse. Frame houses moved on foundations.

TSUNAMIS

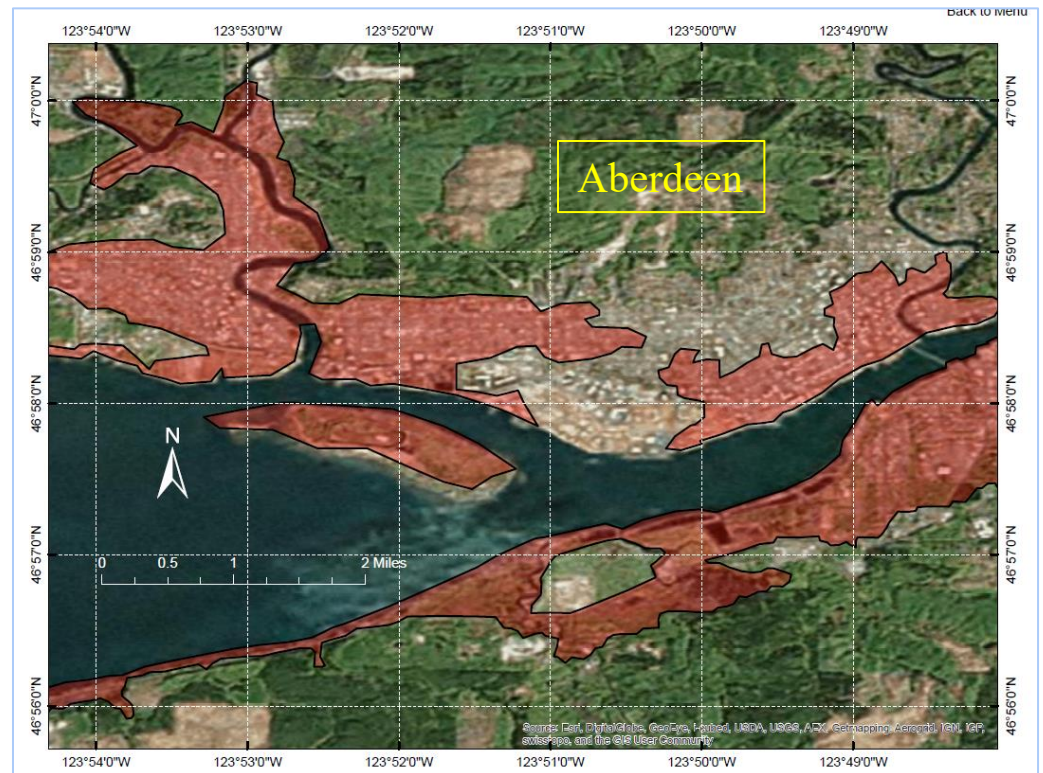

Possibly an issue for southern Puget Sound in Tacoma or Seattle Fault event

Major issue on coast, northern Puget Sound in Cascadia subduction event

TSUNAMIS

Optional
tsunami-
resistant design
provisions in
ASCE 7-16
(2018 IBC)

FIELD SAFETY

FIELD SAFETY

Travel in teams of two

- Watch for stress symptoms

Wear a hard hat

Survey building before entering

Enter only if safe

Avoid hazardous materials

FIELD SAFETY (CONT.)

Use safety equipment

Be alert for falling objects

In case of fire, evacuate area and alert fire department

Avoid downed power lines

Report gas leaks

Take care of yourself (eat, sleep, take breaks, pace yourself)

US&R MARKING SYSTEM

US&R/USAR teams generally on site before BSA teams

BSA Evaluators may encounter markings on buildings

Understanding the markings

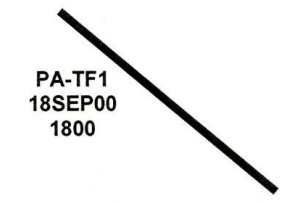

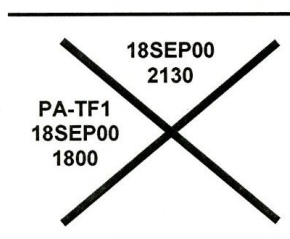

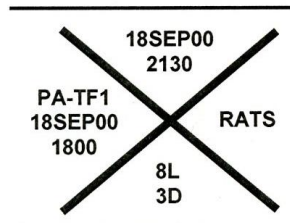

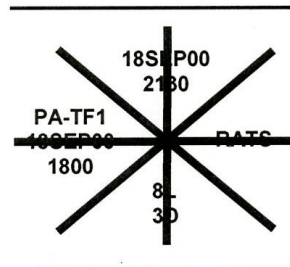

BSA Evaluators are not to mark the buildings

STRUCTURE/HAZARDS MARKS

15JUN92
HM NATURAL GAS
OR-1

FEMA SEARCH ASSESSMENT MARKING

 <p>PA-TF1 18SEP00 1800</p>	<ul style="list-style-type: none"> ▪ Single slash upon entry into structure ▪ TF ID, date & entry time noted ▪ Indicates ongoing search
 <p>18SEP00 2130</p> <p>PA-TF1 18SEP00 1800</p>	<ul style="list-style-type: none"> ▪ Crossing slash upon exit ▪ Upon exit, date and time noted in top field ▪ Additional information placed in open areas of "X"
 <p>18SEP00 2130</p> <p>PA-TF1 18SEP00 1800</p> <p>RATS</p> <p>8L 3D</p>	<ul style="list-style-type: none"> ▪ Right - hazards ▪ Bottom - # of victims
 <p>18SEP00 2130</p> <p>PA-TF1 18SEP00 1800</p> <p>RATS</p> <p>8L 3D</p>	<ul style="list-style-type: none"> ▪ When new search completed, cross out previous, and complete new search assessment marking

FEMA SEARCH ASSESSMENT MARKING (INCOMPLETE SEARCH)

- **When search terminated prior to completion:**
 - **Place filled circle at center of slash**
 - **Add date & time search terminated in top field**
 - **Note hazards to right**
 - **Note victims beneath**
 - **Place box below slash, & Note areas searched**
 - **Use “F” to ID floors searched**
 - **Use “Q” to ID quadrants searched**
 - **If only searched Exterior, as in Hurricane, write “No Entry” in box**

VICTIM LOCATION MARKING

POSTING SYSTEM

PRINCIPAL SAFETY CONCERNS

Collapse

Falling hazards

Other hazards

BASIC APPROACH

Right to evaluate

Observe expected damage

Quickly assess unexpected damage

Methodically evaluate structure

- Assume that significant aftershocks will occur, depending on EQ mechanism (if known)

Utilize checklists and safety criteria

Exercise judgment in assessing risks from damage

Communicate risks to public with posting system

Collect and report damage data to jurisdiction

JUDGMENT IN ASSESSING RISK FROM OBSERVED DAMAGE

Amount of risk is not always
proportional to amount of damage

Structural aspects of assessing risk from
damage

- Redundancy
- Brittleness and Ductility

EVALUATION PROCEDURES

1. Survey of the building exterior.
2. Examine the site for geotechnical hazards.
3. Evaluate structural system from inside building.
4. Evaluate for nonstructural hazards.
5. Evaluate for other hazards.
6. Complete forms and post building.
Optional (check with jurisdiction): Make notes for possession retrieval access (exits, corridors, stairways)

POSTING SHOULD

Be timely

Be consistent

Be visible

Be clear

- Who's the audience?

IS THIS CLEAR?

Siu

POSTING SYSTEM

INSPECTED/NO APPARENT HAZARD

(Green): Appears safe for occupancy, unrestricted use or entry allowed

RESTRICTED USE/LIMITED ENTRY

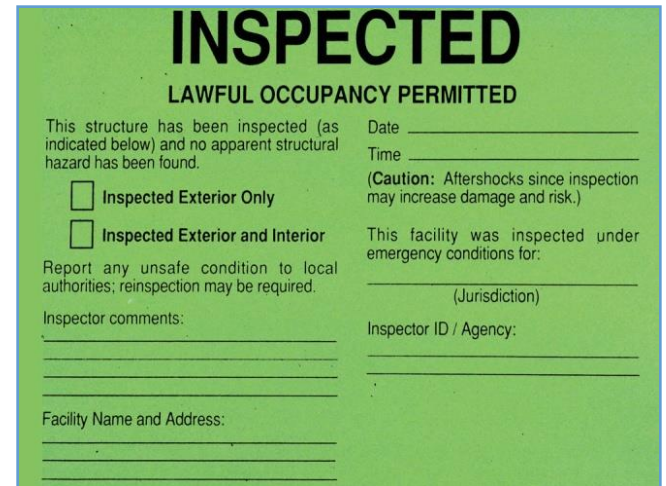

(Yellow): Some restriction/limitation on use or entry

UNSAFE (Red): Entry not allowed

INSPECTED/NO APPARENT HAZARD

Observed damage, if any, does not appear to pose a safety risk

Unlimited entry, occupancy, and use permitted

INSPECTED
LAWFUL OCCUPANCY PERMITTED

This structure has been inspected (as indicated below) and no apparent structural hazard has been found.

Inspected Exterior Only
 Inspected Exterior and Interior

Report any unsafe condition to local authorities; reinspection may be required.

Inspector comments:

Facility Name and Address:

Date _____
Time _____
(Caution: Aftershocks since inspection may increase damage and risk.)

This facility was inspected under emergency conditions for:

(Jurisdiction)

Inspector ID / Agency:

INSPECTED/NO APPARENT HAZARD

Original vertical-load or lateral-load carrying capacity not significantly decreased, no potential instabilities

No falling or other life-safety risks

No evidence of significant foundation damage, uplift, erosion, or ground displacement

Main exits operable and accessible

No other apparent unsafe condition

INSPECTED

LIMITED ENTRY/RESTRICTED USE

Some risk from damage in all or part of building

Restricted

- duration of occupancy
- areas of occupancy
- usage

RESTRICTED USE

Caution: This structure has been inspected and found to be damaged as described below:

Entry, occupancy and lawful use are restricted as indicated below:

Facility Name and Address:

Date _____

Time _____

(Caution: Aftershocks since inspection may increase damage and risk.)

This facility was inspected under emergency conditions for:

_____ (Jurisdiction)

Inspector ID / Agency _____

Do Not Remove, Alter or Cover this Placard until Authorized by Governing Authority

Restrictions enforced by owner / manager

LIMITED ENTRY/RESTRICTED USE

Safety issues can only be resolved by removal of architectural elements or by an Engineering Evaluation

Cladding damage may result in further damage

Interior finishes or ceilings...may lead to falling hazards or air quality issues

LIMITED ENTRY/RESTRICTED USE

Possibility of further damage due to foundation conditions & occupant load

Possible presence of other risks (toxic materials release, etc.)

Portion of the building cannot be safely occupied

LIMITED ENTRY/RESTRICTED USE

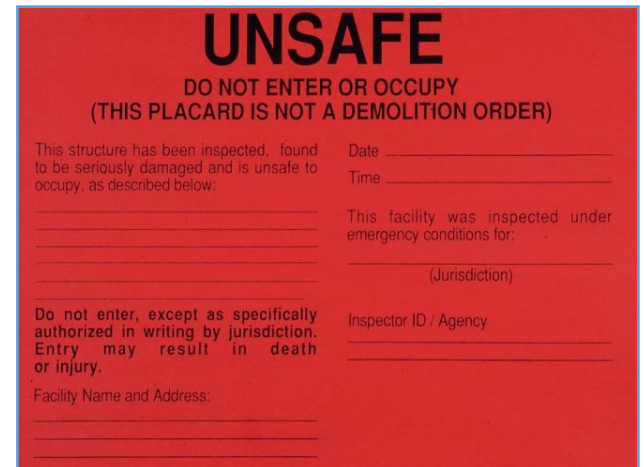

UNSAFE

Falling, collapse, or other hazard

Does not necessarily indicate that demolition is required

Owner must mitigate hazards to satisfaction of jurisdiction to gain entry

UNSAFE
DO NOT ENTER OR OCCUPY
(THIS PLACARD IS NOT A DEMOLITION ORDER)

This structure has been inspected, found to be seriously damaged and is unsafe to occupy, as described below:

Date _____
Time _____

This facility was inspected under emergency conditions for:

(Jurisdiction)

Do not enter, except as specifically authorized in writing by jurisdiction. Entry may result in death or injury.

Inspector ID / Agency _____

Facility Name and Address:

UNSAFE

Obvious safety risks are present

Structure is believed to be in danger of collapse from static conditions, subsequent events, or addition of occupant loads

Another unsafe condition is present

UNSAFE

UNSAFE

UNSAFE

NOTES ON POSTING

Consider earthquake mechanism

- Large aftershocks very unlikely in deep event (i.e. Nisqually)
- Aftershocks likely in subduction or shallow fault events (i.e. Cascadia & Seattle Fault)

Consider if other hazards or political issues are greater

NOTES ON POSTING (fr. ATC-45)

“There is a benefit to the community if a building can safely be posted Restricted Use instead of Unsafe.”

“It is important that posting decisions be carefully considered, particularly those that will displace individuals and businesses.”

“Unnecessarily conservative postings must be avoided”

CHANGING A POSTING

Correct oversight or mistake in judgment

Significant aftershock

Engineered reevaluation and repair

POLITICS OF RESPONSE

“THE LOMA PRIETA QUAKE: WHAT ONE CITY LEARNED”

Richard C. Wilson
City Manager
Santa Cruz,
California

Published by
International City/County Management Association

“THE LOMA PRIETA QUAKE: WHAT ONE CITY LEARNED”

“The city was ... under enormous pressure to provide access to damaged buildings.”

“Residents wanted to remove ... valued personal belongings ... cash and essential documents.”

“Business owners wanted to remove inventory ... computers ... files.”

“At each afternoon’s city council meeting they pleaded for access.”

“We had to decide whether to err on the side of access or safety. The needs for access were urgent and compelling, but the dangers were real and manifest.”

“THE LOMA PRIETA QUAKE: WHAT ONE CITY LEARNED”

“Many of the occupants of even the three most seriously damaged buildings were more than prepared to risk their lives to remove contents.”

“Final decisions about access of course fell to me.”

WASAFE AND VOLUNTEER DEPLOYMENT

WAsafe and Volunteer Deployment

WAsafe Overview

Concept of Operations in WA

- Incident Command System (ICS)
- Activation and Deployment of WAsafe Volunteers
- Roles of WAsafe Volunteers and Local Government

Washington Law – Emergency Management Worker Program,
Good Samaritan Law, Workman's Comp

Enrolling in WAsafe (WAserv)

Interstate Operations - EMAC

Overview: What is WAsafe?

WASAFE

Washington State Safety Assessment Facility Evaluators

Who is WAsafe?

Coalition formed in 2015

- Washington Chapter, American Institute of Architects (AIA Washington)
- Structural Engineers Association of Washington (SEAW)
- Washington Association of Building Officials (WABO)
- American Society of Civil Engineers (ASCE) Seattle Section (2019)

With key assistance from the Washington State Department of Health (DOH) – providing the WAserv registry

WAsafe Objectives

- Assist building officials with building safety assessments following a disaster (earthquake, flood, storm, etc.)
- Develop a group of qualified volunteers
 - Provide WAsafe BSA training
 - Include information on authority, liability & field safety
 - Maintain registry of volunteers
- Assist WA State EMD in calling up and dispatching volunteers to where they are needed in large events
 - Share resources

WAsafe Program Focus

Reoccupy safe buildings

Guidance Documents

ATC-20-1 (2005):
Earthquakes

ATC-45 (2004):
Floods, Windstorms

WAsafe Capabilities

Volunteer enrollment managed by WAsafe member orgs

Response/deployment managed by WA State Emergency Management Division (EMD)

Multi-Hazard

WAsafe Volunteers – Desired Qualifications

- General knowledge of construction
- Professional experience
- Broad building review capability
- Good judgment

WAsafe Resources - Types and Qualifications

Type	Duties/Limitations	Minimum Qualifications
1	<ul style="list-style-type: none"> Structural evaluation only: All buildings, including: Multi-family and commercial structures over 5 stories and complex structures 	<ul style="list-style-type: none"> Registered civil or structural engineer with structural specialty WAsafe BSA or CalOES SAP training with WAsafe-specific module
2	<ol style="list-style-type: none"> Non-structural evaluation: all single family residential, multi-family and commercial buildings Structural evaluation: single family residential, multi-family and commercial buildings up to 5 stories with non-complex structural systems 	<ul style="list-style-type: none"> Certified Building Plans Examiner, Commercial Building Inspector, Building Inspector, Certified Building Official, or Registered Architect WAsafe BSA or CalOES SAP training with WAsafe-specific module

WAsafe Resources – Types and Qualifications (cont.)

Type	Duties/Limitations	Minimum Qualifications
3	<ul style="list-style-type: none"> Wood-framed, multi-family and commercial structures up to 3 stories 	<ul style="list-style-type: none"> Certified Residential Building Plans Examiner or Residential Building Inspector WAsafe BSA or CalOES SAP training with WAsafe-specific module
4	<ul style="list-style-type: none"> Single family residences and associated accessory structures 	<ul style="list-style-type: none"> Any ICC Certification WAsafe BSA or CalOES SAP training with WAsafe-specific module
5	<ul style="list-style-type: none"> As assigned by IC 	<ul style="list-style-type: none"> EITs, Unlicensed Architects, Permit Technicians Relevant Experience WAsafe BSA or CalOES SAP training with WAsafe-specific module

Concept of Operations

Emergency Response Hierarchy

Local Government is always in charge in emergency response.

- Upper levels supply aid to local level
- Hierarchy established by the ***Incident Command System (ICS)***, ***a standardized, all-hazards incident management concept.***

WAsafe – part of a larger system

What Is ICS?

ICS:

- **Is a standardized, on-scene, all-hazards incident management concept.**
- **Enables a coordinated response among various jurisdictions and agencies.**
- **Establishes common processes for planning and management of resources.**
- **Allows for integration within a common organizational structure.**

FEMA

Visual 2.4
ICS Overview

WAsafe – part of a larger system

Other responders:

Red Cross

Fire Fighters

Insurance companies

Medical personnel

Media

Haz Mat teams

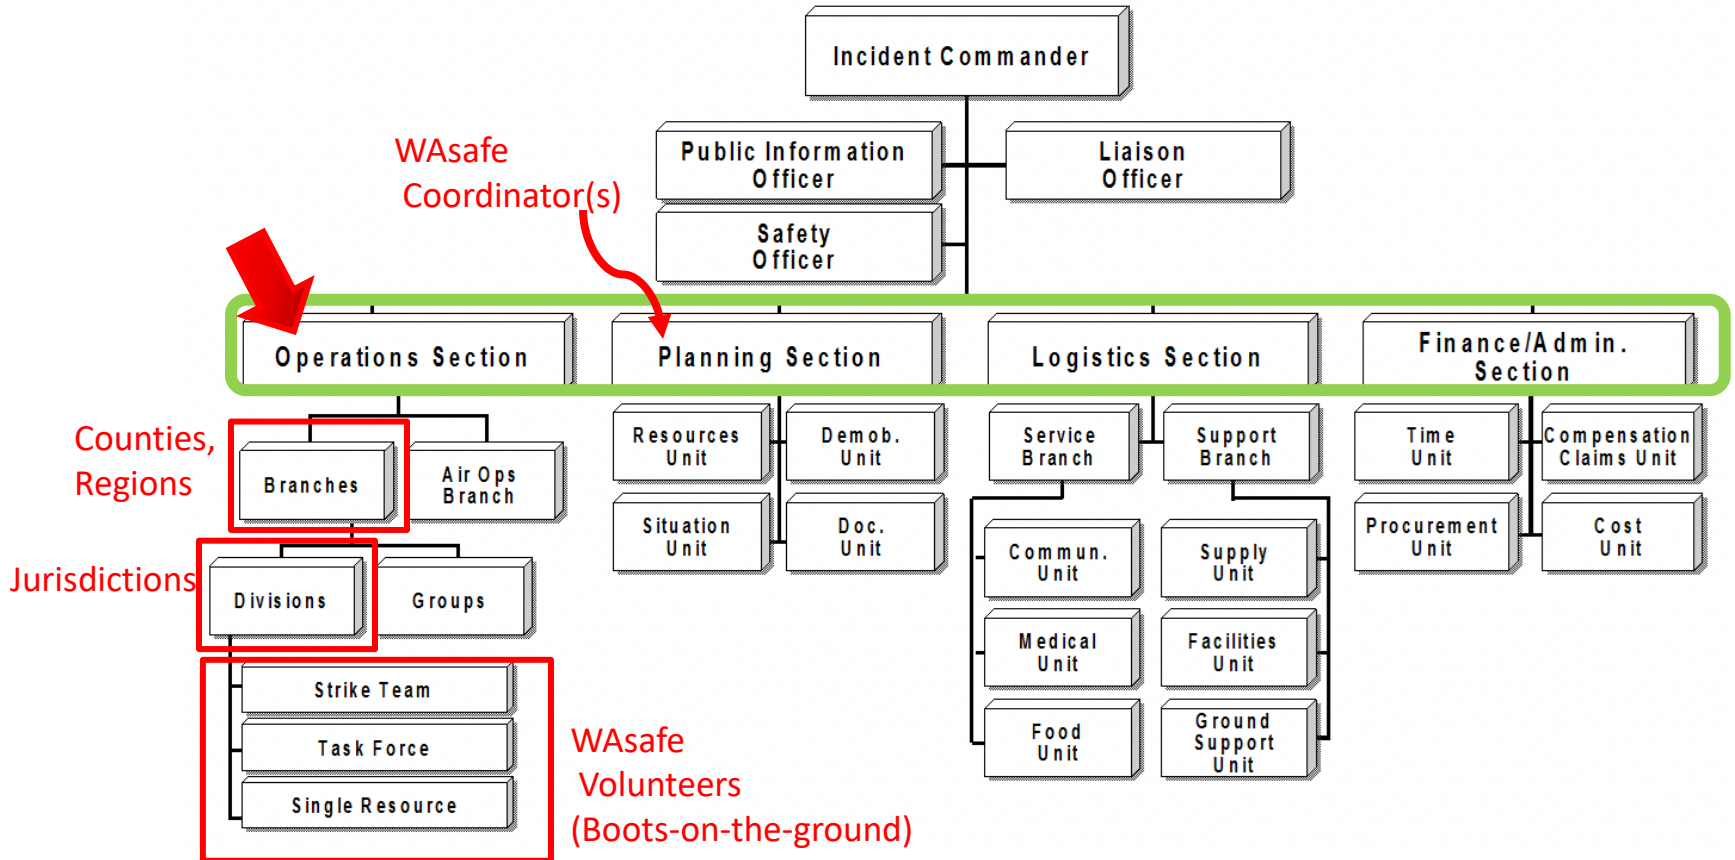

FEMA

Law Enforcement

Small Business Administration

Utility workers

ICS Organization Chart

FEMA IS-Trainings

Independent Study (IS), Online, Free

<https://training.fema.gov/is/>

*Recommended in for WAsafe Volunteers (Boots-on-the-Ground);
Required for NIMS "Post-Disaster Building Safety Evaluator"*

X	X	IS-100	Introduction to the Incident Command System (2 hours)
X		IS-200	ICS for Single Resources and Initial Action Incidents (3 hours)
	X	IS-230	Fundamentals of Emergency Management (6 hours)
X	X	IS-700	An Introduction to the National Incident Management System (NIMS) (3.5 hours)
X		IS-800	National Response Framework, An Introduction (3 hours)

Required for WAsafe Coordinators

WAsafe Activation

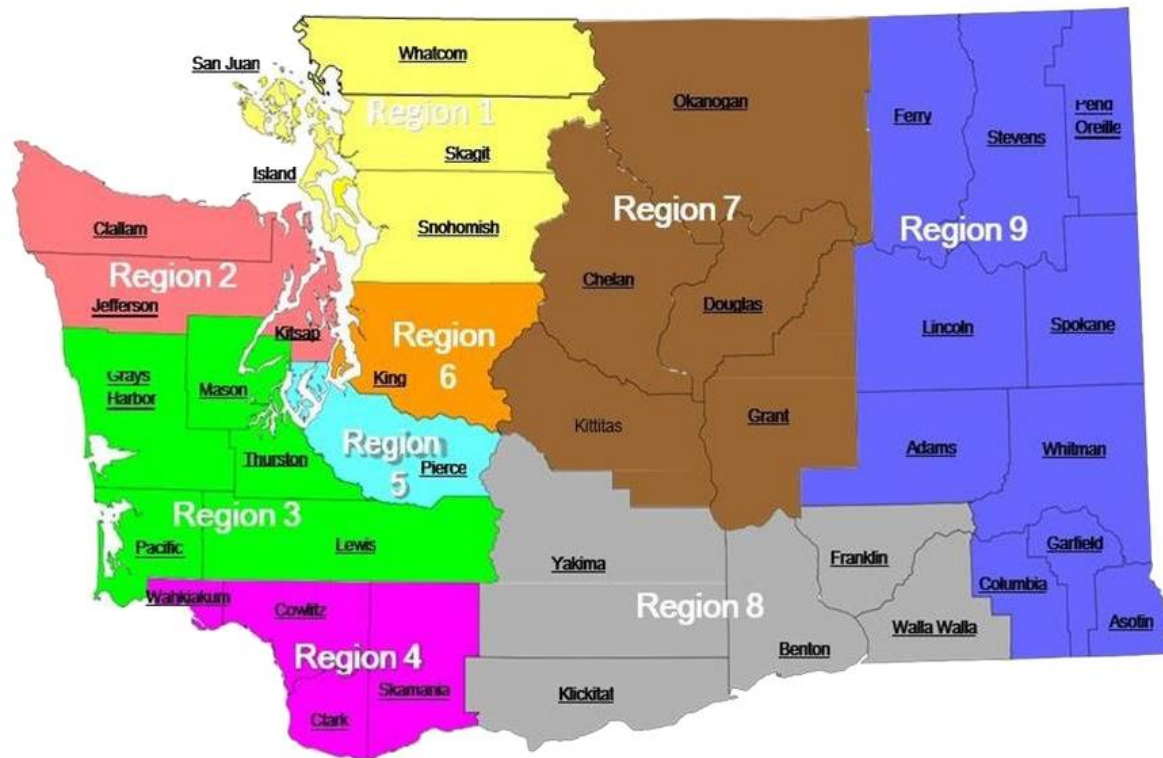

1. Event triggers local response
 - a. Includes mutual aid agreements
2. Local building official requests additional resources through local EOC
3. Local EOC sends request to County
4. County cannot fulfill request => forward request to State
5. A Mission Number is assigned by the State
6. State initiates contact with WAsafe Coordinators

WAsafe Regions in Washington

Washington State Homeland Security Regions

Note: These coincide with Local Health Regions for Public Health Emergency Planning and Coordination

WAsafe Volunteer Expectations

State EOC asks WAsafe volunteers to report to staging area

On first day:

- Report to staging area (local EOC or building department)
- Register as Temporary Emergency Worker
- Receive briefing instructions and refresher
- Deputized by building official

WAsafe Volunteer Expectations

Each day (until assignment is done):

- Report to staging area (local EOC or building department)
- Sign in
- Receive assignments
- Follow guidance of jurisdiction while in field
- At the end of the day
 - Report to staging area to review assessment forms with jurisdiction
 - Sign out

WAsafe – Deputizing

- Non-jurisdiction personnel cannot post official jurisdiction placards unless deputized

WAsafe Volunteer's Role

Provide Rapid Evaluation of Buildings

Provide Detailed Evaluations as directed by the local jurisdiction

WAsafe Volunteer's Role

Do NOT provide COST estimates

- DO provide % DAMAGE estimates, if required by jurisdiction

Do NOT evaluate compliance of grandfathered conditions to current code

Do NOT provide escort or property retrieval services

Do NOT leave business cards

Local Government Role

Provide jurisdictional contact

Issue local placards

Deputize WAsafe volunteers

Coordinate WAsafe volunteer activities

Local Government Role

Briefing information

- Key contact information for Building Official, law enforcement, fire, haz mat, utilities, and animal control
- Relevant local policies

Lodging & Meals information

Ensure necessary authorization exists to allow WAsafe work

Provide EMD with Disaster Data if requested

WA State Law

WA Emergency Worker Program

Is an emergency management program established and regulated by state law.

State coverage:

- Immunity from liability (“Good Samaritan”), and
- Injury/Damage to Individual (Workman’s Comp)

Must be a **registered** Emergency Worker.

Emergency Worker training and employment must be approved by the WA EMD.

WA Emergency Worker Program

Legal Foundation

- RCW 38.52 – Emergency Management Act (Authority)
- WAC 118-04 – Emergency Worker Program (Rules)

<http://www.leg.wa.gov/CodeReviser>

WA Emergency Management Department (EMD) directed to establish the Emergency Worker Program (RCW 38.52.310)

Liability Protection by the State (RCW 38.52.180) aka “Good Samaritan Law”

WA Emergency Worker Registration

(WAC 118-04-080)

Government employees – Covered!

Considered as registered with local OEM if within own jurisdiction;

Outside their jurisdiction:

- Acting under a Mutual Aid agreement; or
- Deployed by State EMD (through WAsafe)

WA Emergency Worker Registration (WAC 118-04-080)

Volunteers

Temporary registration under a Mission Number issued by the WA EMD

Commandeered / Impressment as citizens after Governor's proclamation of disaster

“Permanent” registration may be possible through local Emergency Operations Center (EOC)

- City, County
- Each jurisdiction is different. (Evolving.)

WA Emergency Worker Registration and Building Safety Assessment

Members of a Community Emergency Response Team (CERT) or any other volunteer group which is not registered with a City, County or State emergency management organization are NOT emergency workers as defined in RCW 38.52.010(7)

WAsafe – Reimbursements

Housing, Meals, Travel, and other necessary expenses may or may not be reimbursed by requesting agency.

Volunteers must be on their own time (e.g., vacation).

Mutual Aid requires NO Expectation of Pay for the Providing Resources.

WAsafe – Reimbursements

Public employees may be reimbursed by the requesting jurisdictions

Safety assessment activities are currently eligible for state & federal disaster grants; damage assessment is not.

Signing up with WAsafe

WAsafe – Enrollment

Associated with a Professional Organization (WABO, SEAW, AIA, ASCE or “Other”); and

Meet minimum qualifications

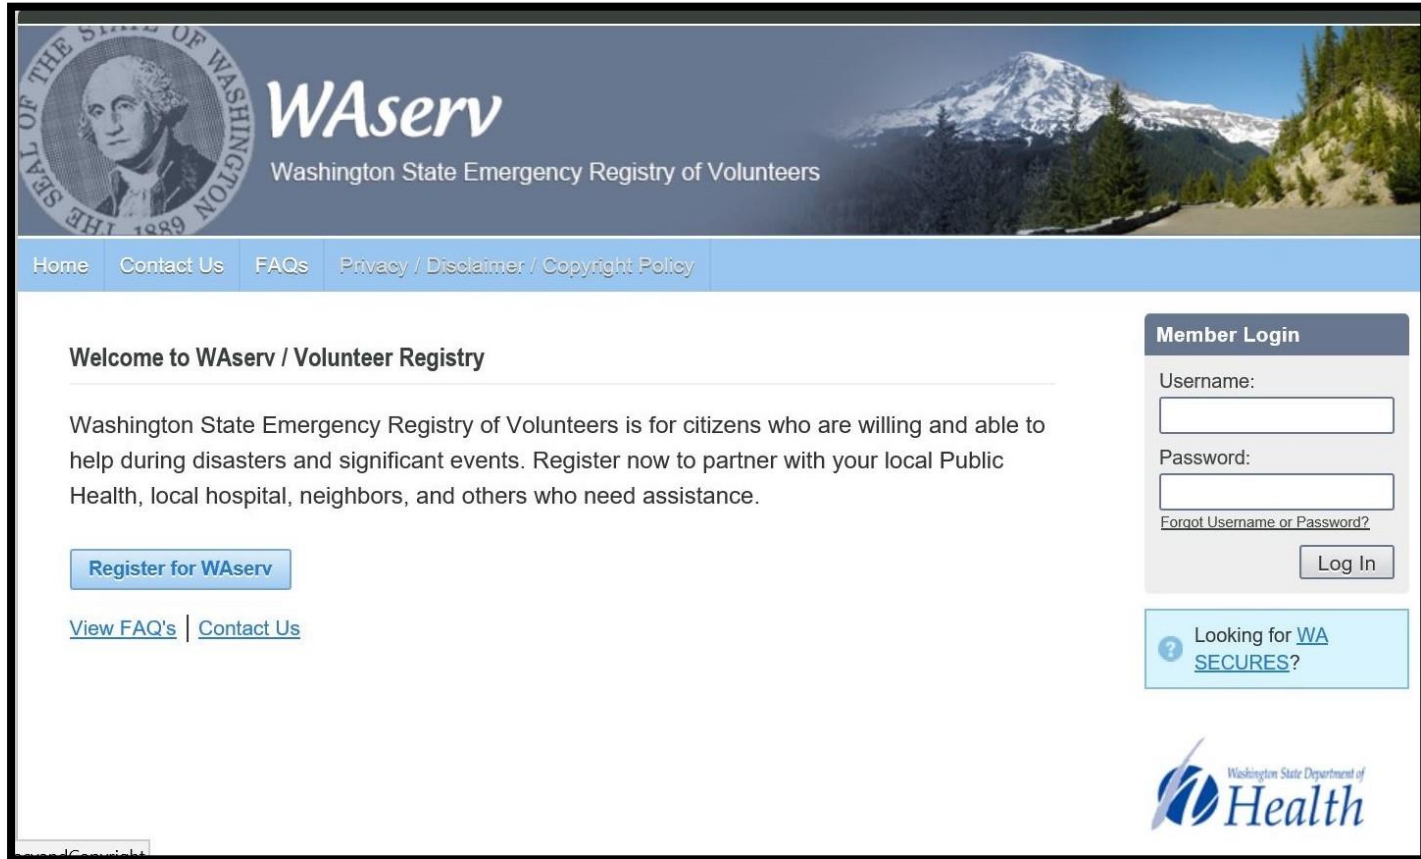

Approved one-day standardized training by a WAsafe certified trainer

Digital picture & documentation

Enroll through WAserv

Washington State Department of Health

WAsafe – Enrollment

- Validation and notification process
 - Non-affiliated volunteers by WABO
- Photo ID Badge
- ID number may be issued when registered as a volunteer with the **local jurisdiction** (ID number is for placards)
- Interactions with WA State EMD (EOC)
- Renewal process
 - Note: WAsafe will require refresher training every 5 years
- Refresher training

Interstate Emergency Management

(EMAC)

Emergency Management Assistance Compact (EMAC)

- State-to-state mutual aid agreement through which states can assist one another directly
- Most States are signatories to EMAC and can provide or receive aid
- Workers comp and immunity coverage is carried forward through EMAC, along with licenses

EMAC – Hurricane Katrina (2005)

Questions?

EVALUATION PROCEDURES

EVALUATION LEVELS

- Windshield – Overall scope of damage
- Rapid** – **Assessment sufficient for most buildings**
- Detailed – Closer assessment of difficult and essential buildings
- Engineering – Consultant engaged by owner

EVALUATION STEPS

1. Examine entire outside of building
2. Examine ground for distress
3. Enter if safe and continue inspection
4. Discuss observations; evaluate by criteria
5. Tape off hazardous areas
6. Post building at all entrances
7. Inform occupants and management of hazards

RAPID EVALUATION

Cursory evaluation (~20-30 minutes), focus on big-picture structural damage

Sufficient to evaluate and post most buildings

Recommend detailed evaluation for questionable buildings

RAPID EVALUATION CRITERIA

Collapse, partial collapse

Building or story noticeably leaning

Severe racking of walls, obvious severe damage

Chimney, parapet, or other falling hazard

Severe ground displacement or foundation damage

Other hazard present

EXAMPLE – CHIMNEY, PARAPET, OR OTHER FALLING HAZARD

Edwards

Siu

**EXAMPLE – SEVERE
GROUND DISPLACEMENT
OR FOUNDATION DAMAGE**

**Tohoku University,
Sendai, Japan**

Siu

**EXAMPLE -
PARTIAL
COLLAPSE**

Posting

Choose a posting based on the evaluation and team judgment. *Severe* conditions endangering the overall building are grounds for an Unsafe posting. Localized *Severe* and overall *Moderate* conditions may allow a Restricted Use posting. Post INSPECTED placard at main entrance. Post RESTRICTED USE and UNSAFE placards at all entrances.

INSPECTED (Green placard) **RESTRICTED USE** (Yellow placard) **UNSAFE** (Red placard)

Record any use and entry restrictions exactly as written on placard: _____

Further Actions Check the boxes below only if further actions are needed.

Barricades needed in the following areas: _____

Detailed Evaluation recommended: Structural Geotechnical Other: _____

Other recommendations: _____

Comments: _____

DETAILED EVALUATION

Careful exterior and interior visual examination by more qualified team

Follows rapid evaluation when required

Important for essential facilities

DETAILED EVALUATION OF ESSENTIAL FACILITIES

Health care facilities

Police and fire stations

Jails and detention centers

Emergency operations centers

High-occupancy shelters
(schools, community centers)

DETAILED EVALUATION CRITERIA

Vertical load capacity not significantly decreased

Lateral load capacity not significantly decreased

No falling or other hazards present

No evidence of foundation damage or ground displacement

Main exits are usable

No other unsafe condition

**EXAMPLE – VERTICAL LOAD
CAPACITY SIGNIFICANTLY
DECREASED**

**EXAMPLE – EXIT NOT
USABLE**
